### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Response to Pre-amendment***

1. The present Office action is made in response to the pre-amendment filed on 1/25/2005. It is note that in the pre-amendment, applicant has canceled claims 11-12. There is not any claim being added into the application. As a result of the change to the claims. The application now contains claims 1-10. It is also noted that in the pre-amendment, applicant has stated that a substitute specification is filed.
2. A review of the pre-amendment has resulted that applicant has failed to provide a marked up copy of the specification, which marked-up copy shows the changes to the specification, as well as a statement that the substitute specification does not contain any new matter. Applicant should file a marked up copy of the specification showing the changes to the specification and a statement that the substitute specification does not contain any new matter in response to this Office action.

### ***Election/Restrictions***

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species (I) directs to an apparatus for obtaining an image of a specimen which apparatus comprises an optical system which is operative throughout a scanning movement to direct light onto a detector; and

Species (II) directs to a method for obtaining an image of a specimen without an optical system which is operative throughout a scanning movement to direct light onto a detector.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The claims are deemed to correspond to the species listed above in the following manner:

Claims 1-9 are directed to species (I) and claim 10 is directed to species (II).

The following claim(s) are generic: There is not any generic claim.

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: An apparatus having an optical system which is operative throughout the scanning movement to direct light

Art Unit: 2872

from a specimen to a detector has different structure and functions with respect to an apparatus without the use of an optical system.

6. A telephone call was made to William M. Lee, Jr. on 3/16/2010 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

### ***Conclusion***

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thong Nguyen whose telephone number is (571) 272-2316. The examiner can normally be reached on M-F.
